and in creating new knowledge it includes theorizations as well as original empirical case studies on the emergence maintenance and change of institutions as well as on their constraining and enabling effects on innovation entrepreneurship art and cultural heritage often at regional scales across europe and north america rooted in the disciplines of management and organization studies sociology geography political science and economics the contributors all take comprehensive approaches to carve out the specific contextuality of institutions as well as their impact on societal outcomes not only does this book offer detailed insights into current debates in institutional theory it also provides background for scholars students and professionals at the intersection between regional development policy making and regulation the development and coordination of managerial devices to help businesses cope with the numerous challenges they face have been the subject of many empirical analyses in recent years this books draws from these studies to answer the question of how to coordinate a team in extreme environments embracing a practice based perspective it identifies work practices and technological uses that improve coordination within teams organizations need to know how to support the coordination of teams that evolve in highly changing uncertain and risky contexts beyond reviewing current literature on the analysis of coordination in the field the author draws on military case studies and illustrations to offer readers practical ways to implement devices that facilitate coordination within teams subjectivity and identity is a philosophical and interdisciplinary study that critically evaluates critically the most important philosophical sociological psychological and literary debates on subjectivity and the subject starting from a history of the concept of the subject from modernity to postmodernity from descartes and kant to adorno and lyotard peter v zima distinguishes between individual collective mythical and other subjects most texts on subjectivity and the subject present the topic from the point of view of a single discipline philosophy sociology psychology or theory of literature in subjectivity and identity zima links philosophical approaches to those of sociology psychology and literary criticism the link between philosophy and sociology is social philosophy e g althusser marcuse habermas the link between philosophy and literary criticism is aesthetics e g adorno lyotard vattimo philosophy and psychology can be related thanks to the psychological implications of several philosophical concepts of subjectivity hobbes stirner sartre building on the global success of the first edition of qualitative research theory method and practice the new edition has been thoroughly updated and revised it succeeds in providing a comprehensive yet accessible guide to a variety of methodological approaches to qualitative research edited by david silverman the book brings together a team of internationally renowned researchers to discuss the theory and practice of qualitative research in

each chapter the contributors broaden our conception of qualitative research by drawing upon particular examples of data analysis to advance their analytical arguments this book is a methodological guide intended for those who wish to better understand how to conduct research in the education and training sciences it is organized into three main parts the first part deals with postures emphasizing the idea that engaging in a research process involves taking a different stance from that of a social or professional actor for example this may require converting a professional or social question into a research question or reflecting on the use of a social vocabulary in research the second part concerns practices that is how research is conducted the definition of a research question based on findings theoretical exploration and problematization the production of empirical information and its analysis and restitution the third and final part concludes by focusing on the diversity of research forms not only research cultures specific to disciplinary fields and approaches such as action research collaborative research or research training but also the design choices in terms of multi inter or trans disciplinarily french sociology offers a uniquely comprehensive view of the oldest and still one of the most vibrant national traditions in sociology johan heilbron covers the development of sociology in france from its beginnings in the early nineteenth century through the discipline s expansion in the late twentieth century tracing the careers of figures from auguste comte to pierre bourdieu presenting fresh interpretations of how renowned thinkers such as Émile durkheim and his collaborators defined the contours and content of the discipline and contributed to intellectual renewals in a wide range of other human sciences heilbron s sophisticated book is both an innovative sociological study and a major reference work in the history of the social sciences heilbron recounts the halting process by which sociology evolved from a new and improbable science into a legitimate academic discipline having entered the academic field at the end of the nineteenth century sociology developed along two separate tracks one in the faculty of letters engendering an enduring dependence on philosophy and the humanities the other in research institutes outside of the university in which sociology evolved within and across more specialized research areas distinguishing different dynamics and various cycles of change heilbron portrays the ways in which individuals and groups maneuvered within this changing structure seizing opportunities as they arose french sociology vividly depicts the promises and pitfalls of a discipline that up to this day remains one of the most interdisciplinary endeavors among the human sciences in france before the immense changes of the 2011 arab spring it was sunni shia sectarian rivalry that preoccupied most political analyses of the middle east this book presents wide ranging and up to date research that sheds light on the political sociological and ideological processes that are affecting the dynamics within the shia and sunni worlds all cultures appear to share the belief that they do things correctly while others until proven otherwise are assumed to be ignorant or barbaric when people from different cultures work together and cannot take shared meanings for granted managers face serious challenges an individual s parsing of an experience and its meaning may vary according to several cultural scales national professional industrial and local awareness of cultural differences and the willingness to view them as a positive are therefore crucial assets this edited textbook sets itself apart from existing cross cultural management texts by highlighting to the reader the need to avoid both ethnocentrism and the belief in the universality of his or her own values and ways of thinking the success of international negotiations and intercultural management depends on such openness and acceptance of real differences it encourages the development of nomadic intelligence and the creative use of a culture s resources according to a symbolic anthropology perspective through the essays and case studies in the chapters readers will become aware of the intercultural dimension of business activities and better understand how they affect work cross cultural management will help interested parties students of business management international relations and other disciplines and business managers and other professionals develop their ability to interact take action and give direction in an intercultural context this book in its second edition continues to present the main models of sociology that have been conceptualised to apprehend the world of organisations from the theories of bureaucracy and human relations to contemporary approaches this book focuses on all the key aspects of sociology of an organisation the concepts defined are marked by the consideration of modes of rationality types of cooperation of networks and power games of systems of decision making and logics of action the book cites the contributions made and the definitions given by the great sociologists like max weber talcott parsons michel crozier renaud

sainsanlieu to help the students understand the topics more clearly this second edition is enriched with studies of discussed cases charts and of extracts of texts pertinent to the productive system to the public sphere and the associative fact the book is intended for the undergraduate students of sociology it will also be of interest to those who on a personal or professional level wish to understand better how companies administrations etc function a classic text about the social study of food this is the first english language edition of jean pierre poulain s seminal work tracing the history of food scholarship the sociology of food provides an overview of sociological theory and its relevance to the field of food divided into two parts poulain begins by exploring the continuities and changes in the modern diet from the effect of globalization on food production and supply to evolving cultural responses to food including cooking and eating practices the management of consumer anxieties and concerns over obesity and the medicalization of food the first part examines how changing food practices have shaped and are shaped by wider social trends the second part provides an overview of the emergence of food as an academic focus for sociologists and anthropologists revealing the obstacles that lay in the way of this new field of study poulain shows how the discipline was first established and explains its development over the last forty years destined to become a key text for students and scholars the sociology of food makes a major contribution to food studies and sociology this edition features a brand new chapter focusing on the development of food studies in the english speaking world and a preface specifically written for the edition this innovative publication maps out the broad and interdisciplinary field of contemporary european social theory it covers sociological theory the wider theoretical traditions in the social sciences including cultural and political theory anthropological theory social philosophy and social thought in the broadest sense of the term this volume surveys the classical heritage the major national traditions and the fate of social theory in a post national and post disciplinary era it also identifies what is distinctive about european social theory in terms of themes and traditions it is divided into five parts disciplinary traditions national traditions major schools key themes and the reception of european social theory in american and asia thirty five contributors from nineteen countries across europe russia the americas and asian pacific have been commissioned to utilize the most up to date research available to provide a critical international analysis of their area of expertise overall this is an indispensable book for students teachers and researchers in sociology cultural studies politics philosophy and human geography and will set the tone for future research in the social sciences the handbook will address a range of issues that have emerged out of recent social and political theory it will focus on key themes as opposed to schools of thought or major theorists each chapter is an emerging cutting edge topic that is of interest both to social theory and to political theory most topics will have a clear and substantive focus on social or political problems this open access book addresses the future of work and industry by 2040 a core interest for many disciplines inspiring a strong momentum for employment and training within the industrial world the future of industrial safety in terms of technological risk management although of obvious concern to international actors in various industries has been quite sparsely addressed this brief reflects the viewpoints of experts who come from different academic disciplines and various sectors such as oil and gas energy transportation and the digital and even the military worlds as expressed in debates and discussions during a two day international seminar the contributors address such questions as what influence will ageing and lack of digital skills in the workforce of the occidental world have on safety culture what are the likely impacts of big data artificial intelligence and autonomous technologies on decision making and on the roles and responsibilities of individual actors and whole organizations what role have human beings in a world of accelerating changes what effects will societal concerns and the entrance of new players have on technological risk management and governance managing future challenges for safety will interest and influence researchers considering the future effects of a number of currently developing technologies and their practitioner counterparts working in industry and regulation où en sont les débats sociologiques dans la france des années 1980 2010 partant de l opposition centrale pour la sociologie entre le collectif et l individuel cet refondue présente des ressources inédites et pose des questions originales au sein des sciences sociales dynamiques en dialogue permanent avec la philosophie this open access book offers unique insight into how and where ideas and instruments of quantification have been adopted and how they have come to matter rather than asking what quantification is new politics of numbers explores what quantification does its manifold consequences in multiple domains it scrutinizes the power of numbers in terms of the changing relations between numbers and democracy the politics of evidence and dreams and schemes of bettering society the book engages foucault inspired studies of quantification and the economics of convention in a critical dialogue in so doing it provides a rich account of the plurality of possible ways in which numbers have come to govern highlighting not only their disciplinary effects but also the collective mobilization capacities quantification can offer this book will be invaluable reading for academics and graduate students in a wide variety of disciplines as well as policymakers interested in the opportunities and pitfalls of governance by numbers welfare offices usually attract negative descriptions of bureaucracy with their queues routines and impersonal nature are they anonymous machines or the locus of neutral service relationships showing how people experience state public administration the bureaucrat and the poor provides a realistic view of french welfare policies institutions and reforms and in doing so dispels both of these myths combining lipsky s street level bureaucracy theory with the sociology of bourdieu and goffman this research analyses face to face encounters and demonstrates the complex relationship between welfare agents torn between their institutional role and their personal feelings and welfare applicants required to translate their personal experience into bureaucratic categories placing these interactions within the broader context of social structures and class race and gender the author unveils both the social determinations of these interpersonal relationships and their social functions increasing numbers of welfare applicants coupled with mass unemployment family transformations and the so called integration problem of migrants into french society deeply affect these encounters staff manage tense situations with no additional resources some become personally involved while others stick to their bureaucratic role most of them alternate between involvement and detachment assistance and domination welfare offices have become a place for re socialisation where people can talk about their personal problems and ask for advice on the other hand bureaucratic encounters are increasingly violent symbolically if not physically more than ever they are now a means of regulating the poor after western hegemony in social sciences we are living in a global change from the chinese experience in sociology the author is opening a transnational space to produce a post western sociology this is a scientific revolution in the social sciences testing for genetic diseases or traits is a rapidly developing practice the most widely used form of testing currently in use being newborn screening based on a five year research project and winner of the prix le monde for academic research in france the birth of a genetics policy analyses the three dimensions scientific political and moral of the social issues raised by a policy of screening for the genetic disease of cystic fibrosis amongst babies drawing on extensive interview material and observational research it explores the conditions under which a screening policy is decided upon and implemented the types of political logic underlying it and the effects it has on norms and values revealing the ties that exist between forms of biomedical knowledge and political techniques whilst showing how the notion of biomedical abnormality is being extended this book sheds light on judgements surrounding the idea of the quality of life a rigorous examination of the discourses and practices of medical genetics in the early twenty first century the birth of a genetics policy will appeal to sociologists and anthropologists with interests in medicine and the body evidence based care and questions of biopolitics and
