ford was unique in that it had two very different big block engine designs during the height of the muscle car era the original fe engine design was pioneered in the late 1950s primarily as a more powerful replacement for the dated y block design what began as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won le mans and drag racing championships throughout the 1960s by the late 1960s the fe design was dated so ford replaced it with the 385 series also known as the lima design in displacements of 429 and 460 ci which was similar to the canted valve cleveland design being pioneered at the same time it didn t share the fe pedigree of racing success mostly due to timing but the new design was better in almost every way it exists via ford motorsports offerings to this day beginning in 1971 the 429 found its way between the fenders of mustangs and torinos in high compression 4 barrel versions called the cobra jet and super cobra jet and they were some of the most powerful passenger car engines ford had ever built if the muscle car era had not died out shortly after the release of these powerful engines without a doubt the 429 performance variants would be ranked with the legendary big blocks of all time in this revised edition of how to rebuild big block ford engines now titled ford 429 460 engines how to rebuild ford expert charles morris covers all the procedures processes and techniques for rebuilding your 385 series big block step by step text provides details for determining whether your engine actually needs a rebuild preparation and removal disassembly inspection cleaning machining and parts selection reassembly start up and tuning also included is a chapter in building the special boss 429 engines make incredible horsepower from ford s most powerful big block engine design for years ford relied on the venerable fe big block engine design to power its passenger cars trucks and even muscle cars and why not the design was rugged reliable amortized and a proven race winner at le mans and drag strips across the country however as is always the case with technology time marches on and ford had a new design with many improvements in mind enter the 385 family of engines also known as the lima big block produced from 1968 1998 the 385 series engines were used in multiple applications from industrial trucks to muscle cars and luxury cruisers in ford 429 460 engines how to build max performance which was written by ford expert jim smart all aspects of performance building are covered including engine history and design induction systems cylinder heads the valvetrain camshaft selection the engine block and rotating assemblies the best options optimal parts matching aftermarket versus factory parts budget levels and build levels are also examined the 429 460 engines are a good platform for stroking so that is covered here as well whether you want to build a torque monster
